Subject: FW: September 17, 2019 Small Business Environmental Assistance Program (SBEAP) Technical Committee on Oil and Gas Compliance Assistance

Hi Beth –

I wanted to forward this agenda as an FYI. I will be participating with OECA regarding UIC enforcement matters. This call/presentation is for the Small Business Environmental Assistance Program (SBEAP) Technical Committee on Oil and Gas Compliance Assistance - Environmental Compliance Information for Energy Extraction (<https://www.eciee.org>). Jeff Speir (OECA) and I will briefly cover UIC matters (~5 mins).

Call-in information is on the agenda and I can forward the invite if interested.

More information about SBEAP can be found on its website: <https://nationalsbeap.org/>. The Technical “Subcommittee” holds conference calls each month, and is chaired by Mark Stoddard of Indiana DEM.

Please let me know if you have any questions.

Subject: RE: July 16 webinar - reschedule to September 17, 2019?

Hello, Mark. I will be out of the office next week so I wanted to give you a heads up in where we are in a draft agenda and the bios I have at this point. Some folks are out on vacation so please expect that this will be updated before Tuesday, Sept. 17.

It looks like we have a jammed packed agenda, which I hope will be very helpful to your Committee! Will you be inviting just the Committee members or SBEAPS in oil & gas states, too? Also, some of our presenters may have slides—will there be a way to present them in the Zoom meeting?

BIOS:

Daniel Hoyt, Environmental Engineer: Dan works in the Stationary Source Enforcement Branch in the Office of Civil Enforcement. He regularly coordinates with regional and state counterparts to perform Clean Air Act (CAA) inspections of stationary sources, including oil and gas facilities, and provides support for follow-up enforcement and compliance assurance activities. Dan has worked for EPA since 2011 including three years in the Dallas Region 6 office, and worked for a local government environmental enforcement program in Houston, Texas prior to his career at EPA. Dan received his BS in Chemical Engineering from the University of Texas at Austin and his MS in Environmental Engineering from the University of Houston.

Jesse Pritts is an environmental engineer with the US EPA's office of water. He is the lead on the Agency's Clean Water Act regulatory activities related to oil and gas extraction wastewater management under the effluent guidelines program. His presentation will cover several recent and ongoing projects related to this topic.

Chris Williams works in the Stationary Source Enforcement Branch in the Office of Civil Enforcement. He regularly coordinates with regional and state counterparts to perform Clean Air Act (CAA) inspections of stationary sources, including oil and gas facilities, and provides support for follow-up enforcement and compliance assurance activities. Chris has worked for EPA since 2015 and worked as a consultant for industry prior to his career at EPA. Chris received his BS in Chemical Engineering from The Ohio State University.

Amy Hambrick works in the Sector Policy and Program Division of the Office of Air Quality Planning and Standards. She works on air regulation development for the oil and natural gas sector and the waste incineration sector. Amy has been with EPA since 2006 and has worked in both Regional and Headquarters offices over the years.

Marcia and I will plan to be on the call but won't be presenting.

More later!

Subject: RE: July 16 webinar - reschedule to September 17, 2019?

Catherine,

How many people will be speaking in addition to Mr. Pritts?

Mr. Pritts supplied me with his bio and what he is to cover. Other presenters? Other components to the presentation?

I assume that what we will be viewing is the presenters computer screen, not a power point presentation?

As the Oil & Gas proposed rule was recently signed and is to be published most likely on September 17, 2019, will someone be covering it or leave it for another date?

It would be a good idea to call in about fifteen minutes early, 1:45 pm EST on Tuesday, September 17 to work through any potential logistical issues such as transitioning from one speaker to the next, etc.

Hi Mark – I'm out for a while after today, so I'll send my bio and presentation info. now.

Jesse Pritts is an environmental engineer with the US EPA's office of water. He is the lead on the Agency's Clean Water Act regulatory activities related to oil and gas extraction wastewater management under the effluent guidelines program. His presentation will cover several recent and ongoing projects related to this topic.

Subject: RE: July 16 webinar - reschedule to September 17, 2019?

Catherine,

Yes

Invite as many experts as you feel are necessary.

Nancy Larson, Kansas State University, as the host of the zoom meeting reserves time, generally the 3rd Tuesday from 2 to 3 pm EST.

About 1 to 3 weeks prior, Donovan or I will prepare an agenda including the same contact information (web address, phone numbers and meeting ID) along with a speaker bio or bios as well as a summary of the presentation typically 2 or 3 sentences for both speaker bio and presentation summary.

Donovan or I follow-up with another Outlook invitation to the SBEAP technical community as well as interested parties.

I hope this information helps!

Excerpt from current Outlook calendar for Tuesday, September 17, 2019 from 2 to 3 pm EST.

Subject: RE: July 16 webinar - reschedule to September 17, 2019?

Catherine,

The energy extraction portal, as I understand, is a resource that can be used to better understand how to comply with the various federal and possibly state environmental regulations that affect the operation or management of oil and natural gas wells located on shore.

How can we navigate the portal to make the fullest uses of its resources?

As a subtopic, how is production or produced water generated? How is it managed? Can it be used for winter time road deicing? From what I think I understand, this water is typically decanted and filtered at the wellhead or in close proximity.

What are some of the common issues affecting this sector?

What are some resolutions to some of the negative findings from inspections conducted at locations in this sector?

I believe the 2016 Effluent Limitation Guidelines includes a provision that impacts wastewater associated with oil & gas drilling, well operations and/or other production activities. How will the new guidelines impact this sector? What are some of the key takeaways or provisions when considering how to comply?

My SBEAP Technical Subcommittee co-chair, Donovan may have further to add.

Thank you for the opportunity!

Subject: July 16 webinar

Donovan and Mark,

I reached out to our contacts at the EPA and unfortunately they are not ready/able to participate in the July 16th webinar. They could possibly do a later webinar but would need advance notice in order for the produced water and clean air EPA folks to prepare.

Given that Catherine Tunis did the overview of the energy extraction website during the May webinar, it would be very repetitive for George and I to do that again, so I'm sending this today to give you as much notice as I have that we will need to withdraw from the July 16th webinar.

I apologize for any inconvenience this may cause, but I wanted to keep you informed.

Thank you,
